## Professional Experience

---

03/2025 – 06/2025	<b>FrontEnd Engineer</b> <i>FrontEnd developer</i> Completed a Frontend Developer internship at Crevita, working on a MERN stack web application integrating frontend features with backend APIs.
12/2024 – 03/2025	<b>FrontEnd Developer</b> Completed a Frontend Developer internship at Crevita, contributing to a MERN stack web app by building reusable, responsive React components.

## Skills

---

- Programming Language - Python, JavaScript, React js, Angular js, TypeScript, EJS, Express js, Node js, SQL
- Developer Tool - Git, VS code Pycharm
- Operating System - Windows, linux

## Projects

---

### QuickBid [↗](#)

QuickBid is a work-in-progress e-commerce auction platform built with React, featuring a responsive Tailwind CSS interface. It enables product browsing and real-time bidding using React Router and Context API. Backend integration for user authentication and database storage of listings and bid histories is under development.

### Currency Converter

The Currency Converter, built with the MERN stack (MongoDB, Express.js, React, Node.js), allows users to convert currencies using real-time exchange rates from an external API. It features a responsive React interface with currency dropdowns, instant conversions, and MongoDB-stored history, with Node.js and Express.js handling backend logic.
